RE: Tifa Ltd. - Millington, New Jersey

Dear Mr. Boehmer:

As we discussed in our telephone conversation of May 1, 1985, the Department has secured a letter from the National Gypsum Company (National Gypsum) stating that National Gypsum consents to the Department entering upon Tifa, Ltd's Millington, New Jersey plant site for the purpose of conducting its Phase II Dioxin investigation. (A copy of this letter is attached hereto.) You have agreed that this letter satisfies the request made in your March 27, 1985 letter and have, on behalf of your client, Tifa, Ltd, granted the Department access to Tifa's Millington, New Jersey plant site.

As it stands now, the Department will be visiting the site on two different occasions in May 1985. During these visits, the Department will conduct the Phase II Dioxin sampling and also will conduct a general site walk through. The site walk through will be for the purpose of familiarizing some of the Department's technical staff with the site layout. As agreed, representatives of the Department will contact you with the details of these visits as soon as possible.

I trust the above accurately reflects our understanding of the matter. Should you have any questions, I can be reached at 609-292-9320. Your cooperation in this matter is greatly appreciated.

Very truly yours,

*John F. Dickinson*
